### CHAPTER 6

#### RESULT AND DISCUSSION

For testing of bio-chemical parameters, samples were collected from the following 9 areas/water sources. The analytical data is tabulated here:-

| HYDROLOGICAL PARAMETERS |                                     |             |           |           |
|-------------------------|-------------------------------------|-------------|-----------|-----------|
| No                      | Area                                | Sample Code | TDS (ppm) | pH        |
| 1                       | Nevta Dam                           | A           | 754       | 8.8       |
| 2                       | Nevta Pond                          | B           | 665       | 8.7       |
| 3                       | Nevta Bore well 1 (Near to Dam)     | C1          | 754       | 8.5       |
| 4                       | Nevta Bore well 2 (Near to College) | C2          | 1570      | 7.7       |
| 5                       | Campus Boring                       | D           | 855       | 8.1       |
| 6                       | College R O                         | E           | 39        | 8         |
|                         |                                     |             | 252       | 7.9       |
|                         |                                     |             | 265       | 7.9       |
|                         |                                     |             | 572       | 7.8       |
|                         |                                     |             | 50 - 150  | 6.5 - 8.5 |

## Student's Anandam Project Files

**ANANDAM PROJECT REPORT**

**CREATING AWARENESS OF CIGARETTE BUTT POLLUTION**

A Project Report  
Submitted To  
**University of Rajasthan**

**For Anandam Programme**

Of

**B.A. Economics**

Everyone is involved in protecting the environment. Smokers can become aware of the environmental impact of a cigarette butt throw. Non-smokers can in turn educate their smokers. It is then possible to send messages to as many people as possible.

We have also targeted youth, as there is a high chance that they get indulged in activities like smoking and it is easier to reverse our habits in an early stage rather than regretting when it turns into an addiction. We interacted with some young people of our age and even elders and tried to raise awareness about this issue.

*[Handwritten Signature]*  
Principal

## Screenshot of Aanandam Project Files

When we approached people they even praised us for making them aware of something out of the box like this, some people who were already aware of this even asked us to raise a campaign for this cause and they will also support us.

The major learning that we received from this project and we will retain it for a lifetime is that we should not let pass small petty things in life because they also have catastrophic consequences.

### ACHIEVEMENTS & BENEFITS OF THE PROJECT

Under this project, we created awareness in the society regarding the pollution caused due to littering of cigarette butts and restricting the pollution caused by butts, thus creating a safe and liveable environment around us.

We hope that our efforts reach the target audience and stir up eco-friendly behavior in everyone.

## Project File: ER Diagram in Report

4.6 ER-diagram: In software engineering, an entity-relationship model (ERM) is an abstract and conceptual representation of data. Entity-relationship modelling is a database modelling method, used to produce a type of conceptual schema or semantic data model of a system, often a relational database, and its requirements in a top-down fashion.
