## TRANSPORTATION AND CARPOOLING SYSTEM TO MINIMISE CARBON FOOTPRINT

Transportation is a significant contributor to greenhouse gas emissions, and college campuses are no exception. With a growing awareness of environmental issues, St. Xavier's College Jaipur, explores sustainable transportation options to reduce the carbon footprint, it therefore promotes carpooling among students, faculty, and staff.

## ORGANIC FARMING

Organic farming on our campus has been a flourishing endeavor, contributing positively to both our community and environment. We've implemented various organic farming techniques such as composting, crop rotation, and natural pest control. These practices not only yield healthy produce but also enrich our soil and promote biodiversity. The organic farm supplies fresh produce, promoting a culture of healthy eating and supporting local food systems. This farm-to-table approach reduces our carbon footprint. Campus organic farming exemplifies how small-scale agriculture can have a significant impact on campus life, fostering community engagement, and healthy living.

## FLORA & FAUNAL BIODIVERSITY IN CAMPUS

Biodiversity refers to all forms of life on earth that provides the core benefits, which humans derive from the environment viz. food, air, water security, and other natural benefits. Plants define the habitat of a site, providing structure, shelter and food as well as contributing to the overall biodiversity. Plants include trees, shrubs, grasses and herbaceous plants. To contribute in the global targets (SDG-15) set by United Nations, our college has taken several initiatives to protect, restore and promote sustainable development. In our college campus, more than 120 plant species are cultivated and nearly 4000 plants in total are sustained. Among the 120 plant species, they are characterized into medicinal, forest, ornamental and fruit plants.

St. Xavier's College, Jaipur, is situated besides the Nevtam Dam, Jaipur, Rajasthan, which provides a tranquil and healthy ecosystem to the campus. An avian diversity study has been conducted to establish baseline information on the number of resident bird species in and around the campus. So far, 30 species have been identified within our campus. The food abundance, climatic conditions, shelter or temporary shelter indicates the favorable ecological condition/ environmental status for the birds.

## Biodegradable cups & cutlery

St. Xaviers College Jaipur minimizes the usage of single-use plastic items on campus such as plastic bags, bottles, straws, cutlery and disposable containers within the college premises, as part of its sustainable practices. Use of eco-friendly alternatives like reusable water bottles, cloth bags, and containers made of biodegradable materials are promoted in campus. The administration backs and promotes the use of recycling bins that are placed throughout the campus to properly dispose of waste.
