### DEPARTMENT OF ECONOMICS

### REPORT OF THE INDUSTRIAL VISIT

The Department of Economics, organized an industrial visit to “Parle Industry”, Neemrana, Rajasthan on Wednesday, 16<sup>th</sup> November 2022. A group of 36 students from the undergraduate course in Economics went for the visit along with the department faculty members.

The visit started with an educational session in the auditorium where the students learned about the background and rise of Parle to become one of India's leading manufacturers of snacks and confections.

The students learned about the various product categories produced by the Parle industry, including Parle-G, Krack-jack, hide and seek, Bourbon, kaccha mango bite, mango bite, Poppins, kismi, etc. Parle is renowned for making items of the finest quality, and its manufacturing units can be located in major locations in Nasik, Bangalore, Haryana, Neemrana, Uttarakhand, and Bhuj, among others.

Three goods, Parle-G, Krack-jack, and premium cookies like Hide and Seek, were being made in this production unit in various phases, including raw material preparation, moulding, baking, and packing.

Water, sugar, and milk powder were utilised as raw materials to make dough. The biscuits were moulded into shape, the dough was kneaded by enormous kneading machines, and then they were rolled through the baking oven. The personnel made sure that quality checks were made at each stage.

After baking, biscuits were chilled. Throughout this phase, people were hired to examine the biscuits and separate the defective ones so that the process could continue.

Then, automatic machinery and human labourers, respectively, packed and filled the items into boxes.

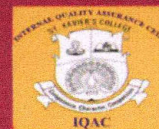

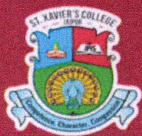

During the visit, it was observed that although the entire process required a lot of capital, personnel were used to assure quality during packaging. According to the authorities, raw materials were bought in bulk, resulting in economies of scale, and at set prices from the same vendors since the commencement of the enterprise. The fact that Parle uses both CPT and SPT to dispose of its waste demonstrates the company's commitment to sustainable development. CPT involves feeding waste to birds. SPT involves recycling waste.

Although brief, the visit was instructive. Then, as a sign of affection, biscuits and cookies were given to all the students. All of the pupils found this to be completely unique and a wonderful learning experience that they much valued. This was entirely different and a great learning experience for all the students which they cherished a lot. Additionally, it encouraged students to apply for internships at these businesses so they could have a thorough understanding of both their operations and the business environment as a whole.

### Learning Outcome

- Provides an insight into the real working environment
- Illustrate processes and products manufactured in the industry.
- Aware of the roles and ethics of working of industries.
- Aware of the impacts of industrial processes on health, safety, environment and society.

## 1.3.2 DEPARTMENT OF ECONOMICS FEEDBACK REPORT OF THE INDUSTRIAL VISIT

The industrial visit to Parle Industry in Neemrana, Rajasthan, proved to be a valuable learning experience for the participants, offering them firsthand exposure to the operations of a renowned food processing company. The visit provided insights into the intricacies of biscuit and confectionery production, as well as valuable career guidance and industry insights.
