ST. XAVIER'S COLLEGE JAIPUR

Nevta - Mahapura Road, Jaipur - 302029, Rajasthan, India

Affiliated to the University of Rajasthan Approved under Section 2(f) &12(B) of the UGC Act, 1956

COURSE OUTCOMES

B.A. (Hons.) Psychology

Department of Psychology

Course Outcomes (COs) B.A. (Hons.) Psychology Part-I P-I/S-I: Advanced General Psychology The learners will be able to: Acquire the historical and modern perspectives and primary methods used in CO 1. psychological research and data collection. CO 2. Illustrate the processes involved in perception and sensation. Outline the various states of consciousness, including sleep, dreams, and CO 3. hypnosis. CO 4. Analyse the meaning, nature, and types of learning CO 5. Evaluate different models of memory and the causes of forgetting Interpret the theoretical approaches to understanding intelligence and its CO 6. assessment CO 7. Identify the basic elements of thinking and problem-solving CO 8. Clarify the theories and concepts related to motivation and emotion Assess type and trait theories to understand personality and its assessment CO 9. CO 10. Characterise the structure and functions of the nervous system.

Course Outcomes (COs) B.A. (Hons.) Psychology Part-I P-II/S-II: Social Psychology Present a comprehensive overview of Social Psychology as a fundamental and CO 1. indispensable branch of Psychology. CO 2. Evaluate the core principles of social cognition Demonstrate understanding of social motivation and factors influencing CO 3. interpersonal attraction CO 4. Examine the development, functions, change, and methods of measuring social attitudes CO 5. Illustrate the functioning of social groups and organisations CO 6. Ascertain the origins, characteristics, types, and theories of leadership Outline the processes and factors contributing to the development of CO 7. prejudices, discrimination, and stereotypes, and propose methods for countering them CO 8. Investigate public opinion formation and the role of propaganda Analyse the basics of aggression, social problems, tension, and CO 9. mechanisms of social change Explore the conceptual foundations of human communication, person CO 10. perception, and social perception

Course Outcomes (COs)	
B.A. (Hons.) Psychology Part-I	
	P-III: Developmental Psychology
CO 1.	Characterise the key themes and methodologies used in the study of human development
CO 2.	Compare and contrast psychoanalytic, learning, and cognitive development theories
со 3.	Outline the characteristics and potential hazards associated with the prenatal and infancy periods
CO 4.	Analyse the characteristics, developmental tasks, and personality development in early and late childhood
CO 5.	Illustrate the characteristics and physical as well as psychological changes occurring during the adolescent period
CO 6.	Identify the key attributes and developmental tasks of adulthood
CO 7.	Investigate old age as a period characterised by significant transitions
CO 8.	Elaborate on the role of family in influencing human development
CO 9.	Investigate and outline the impact of peers, media, and schooling on human development

Course Outcomes (COs)		
	B.A. (Hons.) Psychology Part-I	
	P-IV/S-IV: Statistical Foundations in Psychology	
CO 1.	Determine the nature, scope, and practical applications of statistics in psychological research	
CO 2.	Interpret graphical representations of data and explain the concept of Normal Distribution	
CO 3.	Calculate measures of Central Tendency including Mean, Median, and Mode	
CO 4.	Compute variability measures such as Range, Quartile Deviation, Average Deviation, and Standard Deviation	
CO 5.	Acquire the concept and application of correlational methods, including Pearson's Product Moment Correlation and Spearman's Rank Order Correlation.	
CO 6.	Apply hypothesis testing techniques and draw inferences using 't' tests in psychological research contexts	
CO 7.	Apply non-parametric tests including Chi-Square, 2x2 Contingency table, and Median test for data analysis	
CO 8.	Illustrate data processing using one-way and two-way Analysis of Variance (ANOVA)	
CO 9.	Analyse psychological data using computer software, with a focus on practical applications of SPSS	

Course Outcomes (COs) B.A. (Hons.) Psychology Part-I PRACTICAL: PR 1 CO 1. Analyse the fundamental principles underlying perception Demonstrate an understanding of learning processes through the use of a human maze CO 2. apparatus CO 3. Apply principles of memory to recall words from a list CO 4. Assess and evaluate challenges encountered by the youth CO 5. Analyse the transfer of learning from one context to another. Develop insight into how the acquisition of new information influences existing CO 6. knowledge CO 7. Apply statistical principles of the normal probability curve in practical scenarios CO 8. Assess the attitudes towards nation, discipline, humanity, teachers and spirituality CO 9. Examine levels of social and emotional maturity in individuals.

Understand the concept and measurement of intelligence

CO 10.

Course Outcomes (COs)

B.A. Psychology Subsidiary / Pass Course Part-I

PRACTICAL: S2-PR

PRACTICAL: S2-PR	
CO 1.	Demonstrate an understanding of spatial cognition and learning processes through human maze-learning experiment
CO 2.	Develop proficiency in administering and interpreting intelligence tests
CO 3.	Investigate memory processes by conducting experiments using meaningful and nonsense syllables
CO 4.	Explore visual perception and cognitive processes through experiments on figure and ground reversal
CO 5.	Develop skills in recognising and interpreting emotions through facial expressions
CO 6.	Assess the attitudes towards nation, discipline, humanity, teachers and spirituality
CO 7.	Evaluate leadership qualities and behaviours through leadership assessment tool
CO 8.	Explore the nature and determinants of aggression
CO 9.	Investigate altruistic behaviours and motivations, demonstrating competence in measuring and assessing altruism
CO 10.	Evaluate social support systems and their impact on mental health and well-being

Course Outcomes (COs)		
	B.A. (Hons.) Psychology Part-II	
	P-V: Systems and Theories of Psychology	
CO 1.	Elaborate on the Psychological Foundations laid by Helmholtz, Weber, and Fechner.	
CO 2.	Outline the principles and methods of Structuralism as proposed by Wundt and Titchener	
CO 3.	Investigate the key concepts and perspectives of Functionalism advocated by William James, Galton, and Cattell	
CO 4.	Explore the principles and contributions of Behaviorism as developed by Thorndike, Pavlov, Watson, and Tolman	
CO 5.	Acquire knowledge about the principles and concepts of Gestalt Psychology as proposed by Wertheimer, Koffka, and Kohler	
CO 6.	Characterise Dynamic Psychology and its proponents McDougall and Woodworth	
CO 7.	Examine the major theories of Psychoanalysis, including Freud, Jung, and Adler	
CO 8.	Analyse the contributions and perspectives of Neo-Freudians such as Horney, Fromm, Sullivan, and Erikson	
CO 9.	Explore the key concepts and principles of Humanistic Psychology as advocated by Rogers and Maslow	

Course Outcomes (COs)	
B.A. (Hons.) Psychology Part-II	
	P-VI/S-III: Abnormal Psychology
CO 1.	Draw an overview of Abnormality, Mental Health Professionals, and Classification of Mental Disorders using ICD-10 and DSM-5
CO 2.	Outline the factors contributing to mental disorders and various theoretical perspectives used to understand them
CO 3.	Explore Clinical Assessment techniques and Diagnostic Methods used in psychology
CO 4.	Acquire knowledge about Anxiety, Obsessive-Compulsive, and Trauma Stressor related disorders
CO 5.	Elaborate on Mood and Eating disorders, including their symptoms and causes
CO 6.	Cultivate an understanding of Somatic Symptoms and Dissociative disorders, including their manifestation and treatment
CO 7.	Develop theoretical knowledge about Personality disorders and their classifications
CO 8.	Acquire knowledge about Schizophrenia and other Psychotic Disorders, including symptoms and treatment approaches
CO 9.	Evaluate comprehensively the Psychological Therapies utilised to address mental disorders

Course Outcomes (COs)		
B.A. (Hons.) Psychology Part-II		
	P-VII: Counselling Psychology	
CO 1.	Explore the significance, objectives, historical development, and contemporary trends in counselling	
CO 2.	Elaborate on the counselling process and highlight the importance of establishing a therapeutic alliance.	
CO 3.	Characterise the personal attributes, professional responsibilities, and ethical considerations in counselling	
CO 4.	Study of Psychoanalytic and Psychodynamic Approach: Freudian, Neo Freudian and Modern	
CO 5.	Review the Humanistic approach, including Existential and Client-centered perspectives.	
CO 6.	Examine the Cognitive and Behavioral approaches, covering Rational Emotive, Transaction Analysis, and Behavior Modification techniques	
CO 7.	Demonstrate the application of counselling approaches in serving diverse populations and multicultural societies	
CO 8.	Ascertain the significance and scope of Career Counselling in guiding individuals towards fulfilling careers	

Course Outcomes (COs)		
B.A. (Hons.) Psychology Part-II		
	P-VIII: Biological Basis of Behaviour	
CO 1.	Articulate the nature, scope and methods of examining the biological basis of behavior	
CO 2.	Describe the basic features, structure and functions of neurons, central nervous system, peripheral nervous system and neurotransmitters	
CO 3.	Explore the functions of left and right brain hemispheres and localisation of language	
CO 4.	Examine the physiological mechanisms controlling ingestive behaviour	
CO 5.	Explore the biological mechanisms involved in managing sleep and wakeful behaviour	
CO 6.	Analyse neural mechanisms involved in the process of learning and Memory	
CO 7.	Diagnose biological underpinnings of emotions, stress and health maintenance	
CO 8.	Acquire insights on Developmental disorders: Autism, ADHD and Mental Retardation	

Course Outcomes (COs) B.A. (Hons.) Psychology Part-II PRACTICAL: PR-2 Evaluate the connection between brain activity and cognitive processes Develop understanding of the messages conveyed by facial expressions Explore misconceptions and biases in perceptual judgment Utilise biofeedback principles to induce relaxation Retrieve basic words by forming associations Analyse conditioned responses of the autonomic nervous system

Analyse stories projected onto ambiguous stimuli and comprehend aspirational

CO 1.

CO 2.

CO 3.

CO 4.

CO 5.

CO 6.

CO 7.

CO 8.

CO 9.

CO 10.

levels

Evaluate levels of mental health

psychometric instruments

Asses and comprehend memory dysfunctions

Assess Personality and Intelligence Quotient using suitable

Course Outcomes (COs)

B.A. Psychology Subsidiary / Pass Course Part-II

PRACTICAL: S4-PR

PRACTICAL: S4-PR	
CO 1.	Acquire comprehensive knowledge and practical skills in assessing mental health
CO 2.	Develop expertise in the assessment of anxiety and distinguishing between state and trait anxiety
CO 3.	Demonstrate competence in assessing depression
CO 4.	Assess coping styles and interpret findings to understand howindividuals adapt to stressors and challenges
CO 5.	Develop skills in assessing family pathology
CO 6.	Acquire proficiency in administering and interpreting the Word Association Test, showcasing an understanding of projective assessment techniques
CO 7.	Demonstrate competence in utilising the Eight State Questionnaire to assess various emotional states and moods
CO 8.	Acquire advanced knowledge and skills in neuropsychological assessment
CO 9.	Showcase the ability to analyse data using statistical techniques such as mean, median and 't' test to understand the collective stress experienced by a group

Course Outcomes (COs) B.A. (Hons.) Psychology Part-III P-IX: Applied Psychology Apply psychological concepts in personnel selection and classification CO 1. procedures Explore techniques used for personal assessment in development and CO 2. training programs CO 3. Cultivate understanding of the basic principles of Organizational Psychology Analyse significant human-related variables within the context of Engineering CO 4. Psychology CO 5. Explore stress causation factors and acquire stress management skills Examine the influence of Information Technology on Human Rights and CO 6. Wellbeing CO 7. Demonstrate the importance of psychology in educational settings Clarify the role of Community Psychology in comprehending social change CO 8. and fostering community awareness Describe the basic elements of Sports Psychology and how psychological factors CO 9. influence performance

Course Outcomes (COs) B.A. (Hons.) Psychology Part-III P-X/S-V: Positive Psychology Acquire knowledge about the fundamentals and historical background CO 1. of PositivePsychology Explore Eastern and Western philosophical perspectives to enrich the CO 2. understanding of Positive Psychology Analyse and categorise virtues and strengths of character within the context of CO 3. Positive Psychology Articulate the concept of Happiness and various dimensions of Well-being CO 4. according to Positive Psychology Classify the fundamental elements, theoretical underpinnings, and CO 5. practical applications of Resilience Examine the elements of Prosocial Behavior, including Empathy, Altruism, CO 6. Gratitude, and Forgiveness Explore the theoretical approaches to understand Self-Regulation and CO 7. examine the associated challenges such as Goal Conflict, Goal Difficulty, and Goal Disengagement Cultivate knowledge about the Positive Cognitive States and Process: Self CO 8. Efficacy, Optimism, Hope, Mindfulness, Flow and Spirituality Acquire knowledge about the Positive Emotional States and Process: Positive CO 9. Emotions, Emotional Intelligence, Emotion Focussed Coping

Course Outcomes (COs) B.A. (Hons.) Psychology Part-III **P-XI: Theories of Personality** Gain foundational understanding of the history, basic concepts, and CO 1. key determinants of personality Analyse Psychoanalytic theories, including Freudian concepts and contemporary CO 2. developments Characterise Neo Analytic and Ego theories proposed by Jung, Adler, Horney, CO 3. and Erikson Explore the influence of Biological, Evolutionary and Sociobiological factors on **CO 4.** personality Understand Behaviorist and Learning theories by Watson, Skinner, Dollard, and CO 5. Miller Dissect Cognitive and Social Cognitive Theories proposed by Kelly, Seligman, CO 6. Rotter, and Bandura Analyse Trait Theories including Cattell, Allport's theories, and the Big Five CO 7. Model Articulate Humanistic and Existential Theories by Fromm, Rogers, and **CO 8.** Maslow Describe the Interactional approach to understanding personality: CO 9. Sullivan, Murray and Mischel

Course Outcomes (COs) B.A. (Hons.) Psychology Part-III P-XII/S-VI: Psychological Testing Analyse and comprehend the meaning, nature, historical background, and tools CO 1. used in psychological testing and assessment. Elaborate on the characteristics, types, and functions of Psychological Scaling CO 2. methods. CO 3. Describe the nature, functions and types of psychological tests Demonstrate the problems encountered during test administration and elucidate CO 4. the standard guidelines for testing Investigate the principles of test construction, including item writing, item CO 5. analysis, reliability, and validity Examine the theoretical framework and practical utility of test standardisation CO 6. and norms CO 7. Differentiate the tools for the assessment of Intelligence Compare and contrast the tests used for evaluating individual's Interest and CO 8. Aptitude Classify the major techniques used by psychologists to assess personality-CO 9. SelfReport Tests, Projective, Situational and Expressive Techniques Elaborate on the applications of psychological testing in Educational, CO 10. Counselling and Guidance, Clinical and Organizational settings

Course Outcomes (COs) B.A. (Hons.) Psychology Part-III **PRACTICAL: PR-3** Apply the principles of sensoryperception to determine and interpret two-CO 1. point discrimination thresholds accurately Analyse the physiological and psychological factors contributing to work-CO 2. related fatigue CO 3. Utilise the Holland codes to assess individual career interests and aptitudes Evaluate and interpret emotional intelligence assessments to enhance self-CO 4. awareness, interpersonal relationships, and overall emotional well-being CO 5. Develop practical skills to assess memory using saving methods Administer and interpret the results of the Differential Aptitude Test to assess CO 6. individual aptitudes across different domains Evaluate altruistic tendencies and behaviours through the structured CO 7. assessment Measure and analyse reaction times in response to stimuli to understand CO 8. cognitive processing speed Analyse personality using responses to the Picture Frustration Study and NEO CO 9. Personality Inventory-Revised Apply standardised procedures to administer and interpret the Rorschach Test CO 10. and analyse the results to gain insights into personality structure, thought processes, and emotional functioning

Course Outcomes (COs)

B.A. Psychology Subsidiary / Pass Course Part-III

PRACTICAL: S6-PR

PRACTICAL: 50-PR	
CO 1.	Develop expertise in assessing subjective well-being and analyse factors contributing to individuals' overall life satisfaction and happiness
CO 2.	Gain proficiency in assessing forgiveness and understand the psychological dynamics involved in the forgiveness process
CO 3.	Assess the level of emotional intelligence
CO 4.	Acquire skills in assessing hope, and understanding the role of hope in resilience and motivation
CO 5.	Evaluate individuals' resilience level to face the challenges
CO 6.	Gain advanced knowledge and skills in intelligence assessment using the Standard Progressive Matrices (SPM)
CO 7.	Demonstrate competence in personality assessment using the High School Personality Questionnaire (HSPQ)
CO 8.	Measure and analyse reaction times in response to stimuli to understand cognitive processing speed
CO 9.	Illustrate the principles of visual perception through Muller-Lyer illusion
CO 10.	Demonstrate proficiency in assessing the level of aspiration and understanding the psychological factors influencing goal-setting and achievement
