PROGRAMME OUTCOMES

B.A. (Hons.) Psychology

Department of Psychology

Programme Outcomes (POs)

The learners will be able to:

PO 1.	Acquire the concepts, major theories, and mechanisms underlying human cognitions, emotions and behaviours and develop the ability to design, conduct, and interpret scientific research
PO 2.	Examine the purpose, construction and standardisation of psychological tools of assessment and apply tests and experiments to evaluate major psychological constructs
PO 3.	Determine the range of statistical measures, generate data visualisations, and explore hypothesis testing techniques and inferential statistics
PO 4.	Ascertain the fundamentals of psychopathological disorders, including diagnosis, prognosis, causal factors, assessment, and therapeutic treatment
PO 5.	Explore the unique aspects of each developmental period, attain an understanding of human growth and development, and apply this knowledge to maximise potential
PO 6.	Recognise, understand and appraise the sociocultural diversity at global level, explain the social change from a psychological perspective and develop the interventions aiming to preserve ethical integrity
PO 7.	Classify the historical contributions of different schools of thought that led to the emergence of Psychology as an exclusive and independent discipline
PO 8.	Provide an overview of the importance of counselling, historical development, scope and its current status
PO 9.	Apply critical and creative thinking skills, utilise sceptical inquiry, and adopt a scientific approach to solve problems
PO 10.	Articulate the role of neural and physiological mechanisms in the determination of human behaviour
PO 11.	Recommend a proactive and thoughtful process of self-examination pertaining to personal ideals, goals, virtues and self-concept
PO 12.	Assess the career opportunities under the discipline of Psychology and cultivate meaningful professional life
