

# Gular

*Ficus racemosa*

## DESCRIPTION

- Gular gets 30-40 ft tall, but its elegant wide-spreading umbrella-like canopy can be wider than its height.
- It does not have aerial roots as a banyan does.
- Gular possesses potent anti-inflammatory and anti-cancer effects..
- Gular trees are not heavy feeders, so you do not need to bother about fertilizing them, especially if you treated the soil at planting time with cow dung manure or vermicompost.
