

Common Name: Madhukamini

Murraya Paniculata

Order: Sapindales

Family: Rutaceae

Genus: Murraya

Species: Paniculata

DESCRIPTION

- It is a species of shrub or small tree in the family Rutaceae
- It is native to South Asia, Southeast Asia and Australia.
- It has smooth bark, pinnate leaves with up to seven egg-shaped to elliptical leaflets, fragrant white or cream-coloured flowers and oval, orange-red berries containing hairy seeds.
- *Murrayapaniculata* is a tree that typically grows to a height of 7 m (23 ft) but often flowers and forms fruit as a shrub, and has smooth pale to whitish bark.
- is cultivated as an ornamental tree or hedge because of its hardiness, wide range of soil tolerance, and is suitable for larger hedges. The plant flowers throughout the year and produces small, fragrant flower clusters which attract bees, while the fruits attract small frugivorous birds.
