

Common Name: Money Plant

Crassula Ovata

Order: Saxifragales

Family: Araceae

Genus: Crassula

Species: Ovata

DESCRIPTION

- The plant is native to South Africa.
- The money plant is a popular houseplant among indoor plant collectors as it is thought to bring good luck and prosperity.
- The ideal temperature for growth is 70°F to 75°F, though the plants can endure lower light levels.
- Plants should be watered regularly. Make sure you maintain intervals between watering to let the soil to dry out. Twice a month, use a balanced fertilizer to fertilize the plants.
- Money plants, besides being visually appealing, can also purify the air in your environment.
