A Christian Minority Educational Institution under Section 2(g) of NCMEI Act, 2004

B.C.A. (Bachelor of Computer Applications)
Programme Outcomes (POs)

The learners will be able to:

- PO1. Analyze the Computer Science theory, conceptual algorithms, data structures, data handling, data representation, and programming.
- PO2. Identify, formalize and compare abstract to machine and address requirements.
- PO3. Apply fundamental knowledge to real-world and abstract problems and implement problem solving skills using theoretical concepts.
- PO4. Identify the requirements to tackle challenges of the industry.
- PO5. Apply mathematical, statistical, and electronic tools to interpret data and solve real-world problems.
- PO6. Analyze, design, realize and prototype, integrating software development and scientific knowledge to real-world, issues.
- PO7. Apply a variety of tools, techniques, and programming languages, programming, experimental, and scientific knowledge to real-world, issues.
- PO8. Apply the knowledge of organizational principles to become professional.
- PO9. Apply data analysis techniques to interpret data and make informed decisions, design, and solve complex, real-world, problems.

B.Sc. (Bachelor of Science)
Programme Outcomes (POs)

The learners will be able to:

- PO 1. Apply mathematical knowledge to solve complex Physics problems, using appropriate mathematical and computational software.
- PO 2. Develop proficiency in designing experiments, using data, and report writing, and critically analyzing results, through experimental data, and theoretical models in Physics, through advanced mathematical, theory, and quality control applications to real-life scenarios.
- PO 3. Conceptualize and solve mathematical functions and mappings in computer languages and software.
- PO 4. Evaluate concepts of Chemistry across various economic, biological, and environmental contexts.
- PO 5. Perform, observe, and analyze the outcomes of Chemistry and Biology experiments.
- PO 6. Illustrate the multidisciplinary approach inherent in the field of plant sciences.
- PO 7. Critique both theoretical principles and practical application in Biology with a focus on environmental sustainability.
- PO 8. Outline fundamental concepts related to the health of the soil, and emphasize on aspects towards biomass.
- PO 9. Apply principles learnt in zoology, relating the understanding of the subject.
- PO 10. Analyze economic theories and quantitative methods to address economic phenomena and propose solutions.
- PO 11. Recognize the diverse factors influencing the global and local decision-making processes.
- PO 12. Interpret data, trends and make evidence-based decisions across sectors.
- PO 13. Conduct research and design new models using statistical modelling.
- PO 14. Analyze spatial patterns, processes, and performance using geographic practical approaches and other tools to understand and solve real-world problems.
- PO 15. Evaluate environmental issues and sustainability, applying practical concepts to address challenges related to climate change, resource management, and urban planning.
- PO 16.

B.A. (Hons.) English	
Programme Outcomes (POs)	
The learners will be able to:	
PO1	Examine literature produced by different literary ages
PO2	Evaluate literary texts from the perspectives of form and content
PO3	Outline the socio-political events based on the study of the texts
PO4	Evaluate the historical and cultural milieu of the texts
PO5	Assess diversity in gender, ethnicity, race, religion and creed to achieve employability
PO6	Appraise environmental and ecological concerns in the texts
PO7	Assess a critical approach and develop research skills to express their findings effectively
PO8	Enhance language skills, etc. including speaking, reading and communication skills

B.B.A.	
(Bachelor of Business Administration)	
Programme Outcomes (POs)	
The learners will be able to:	
PO1	Apply knowledge of management theories and practices to solve business problems
PO2	Enhance cognitive skills for making informed decisions based on data/analysis
PO3	Identify business solutions in the current technology driven environment
PO4	Analyze regional, national, global economic, legal, social and ethical aspects of business
PO5	Develop critical and value-based leadership skills contributing to the achievement of organizational goals
PO6	Understand current and analyze the role of business analytics in decision making
PO7	Develop marketing strategies of a product or a service by understanding customer behavior, preferences, satisfaction, and engagement
PO8	Apply appropriate quantitative and qualitative techniques and identify the practice for solving business problems and suggest alternatives
PO9	Prepare effective business presentations by employing alternative underlying concepts, theory and tools taught in the core undergraduate curriculum
PO10	Identify and analyze relevant global forces that influence decision-making in an international business setting
