Alumni Interaction Session 2025

The Alumni Interaction Session 2025 served as a valuable platform for connecting ideas, technology, and learning by bringing together former students who have established themselves across diverse professional roles. The session featured three distinguished alumni: Mr. Rahul Khemani, a Salesforce Consultant at Atrium Insight AI in the USA; Ms. Yana Kanwar, a Researcher associated with Brainrig and Professor of How; and Ms. Lakshita Rathore, a Process Executive at Infosys, Jaipur. Their varied journeys in AI consulting, research, and corporate IT provided students with authentic insights into the dynamic nature of the tech industry and helped them understand the breadth of opportunities available after graduation.

Through their experiences, the speakers highlighted the importance of adaptability, continuous learning, and practical skill development. They addressed how academic knowledge can be translated into real-world roles, offering students clarity on workplace expectations and the competencies needed to thrive in evolving technological environments. Their interactions made complex industry concepts more approachable and inspired students to think strategically about their career paths.

The session also fostered a sense of community by strengthening the bond between alumni and the department. Students were able to engage in meaningful conversations, ask questions, and gain guidance rooted in real experience rather than theory alone. This exchange not only broadened their perspectives but also enhanced the department's learning ecosystem by integrating industry relevance into academic life. Overall, the Alumni Interaction Session 2025 enriched the academic environment by offering practical exposure, motivation, and a clearer vision of future career possibilities. Total 82 students were participated in the alumni interaction session.
